

ARSALAN ALI

Software Developer | Automations Expert | Flutter & NodeJS Specialist | AI Based Solutions
arsalansoft11@gmail.com | +94 750 780 890 | [Linkedin.com](https://www.linkedin.com) | Puttalam, Sri Lanka.

PROFESSIONAL SUMMARY

Software Developer with 4+ years of experience in web, mobile, and automation development. Over 2.5 years of hands-on experience building workflow automations using Make.com, n8n, and Zapier to improve business processes and efficiency. Skilled in Flutter, Node.js, and Laravel, with experience developing full-stack applications such as real-time chat systems and sports team management platforms with reporting and data tracking features.

TECHNICAL SKILLS

Languages & Frameworks:

Flutter · Dart · Laravel · PHP · TypeScript · React · Node.js · Express JS
Java script · Bootstrap & Tailwind CSS

Databases:

MySQL · PostgreSQL · MongoDB · GraphQL · Firebase · NoSQL

Automations Tools:

Make.com · N8N · Zapier · Air-table · Monday.com · GHL

Tools & Practices:

API Integrate · REST API · Git / GitHub · AI Assistant build & finetune · AI System Prompting · Open AI · Google APP Script · Figma UI/UX

EXPERIENCE

Software Developer	Imara Software Solutions	May 2023 - Present
- Developed cross-platform mobile applications using Flutter with scalable architecture and optimized UI performance. - Designed and built backend services using Node.js, implementing modular architecture and RESTful APIs. - Integrated REST APIs for client and third-party services ensuring secure and efficient data exchange. - Built a full-stack Library Management System using React and Node.js with CRUD operations, role-based access, and optimized database queries. - Engineered a multi-vendor eCommerce platform using Laravel with product, order, and vendor management and scalable database design. - Developed a Flutter-based food delivery app with Google Maps integration, real-time tracking, Stripe payments, and inventory management.		

- Used Git (GitHub, AWS Code Commit) for version control, collaboration, code reviews, and CI/CD workflows.

Web Developer Intern **Imara Software Solutions** **Feb 2023 - Apr 2023**

- Developed responsive and user-friendly interfaces using HTML, CSS, and JavaScript.
- Built enterprise web applications using React, AWS, and MongoDB.
- Developed scalable backend systems using Node.js, Express, and Laravel (MVC architecture).
- Designed and integrated RESTful APIs for seamless frontend-backend communication.

Freelancer **Upwork, Fiver, Freelancer.com** **May 2022 - Jan 2023**

- Developed responsive and user-friendly websites using Shopify, focusing on clean UI and smooth customer experience.
- Customized and built websites using Softr, adapting and enhancing platforms based on existing website structures.
- Optimized website performance, security, and SEO to improve loading speed, search visibility, and overall efficiency.

Self-Taught UI/UX Designer **Figma.com** **2020 - 2022**

- Designed intuitive user interfaces and interactive prototypes for personal and client projects using Figma, focusing on usability and modern design principles.
- Collaborated with developers (in freelance projects) to translate design systems into clean, functional front-end code using HTML, CSS, and JavaScript.
- Built and maintained a portfolio of 10+ design projects, including e-commerce layouts, dashboards, and mobile app screens, receiving positive feedback for visual clarity and interaction design.
- Continuously improved design skills through online courses, design challenges, and real-time feedback from freelance clients.

KEY PROJECTS

Chat-Box : React.js · Flutter · Node.js · Express.js · Socket.io · Cloudinary · Web · iOS · Android

Real-time cross-platform chat application inspired by WhatsApp. Features instant messaging, online/offline status tracking (via connected Socket.io IDs), and media uploads with Cloudinary storage. Built with React for web, Flutter + BLoC for mobile apps, and a Node.js + Express backend. Designed a clean, user-friendly UI for seamless communication across all devices.

Sports Club Manager : Flutter · BLoC · Node.js · Express.js · MongoDB · Firebase

Full-featured club management system with CRUD operations for player logs and match events. Firebase enables real-time match score updates across devices, while Flutter + BLoC delivers a smooth cross-platform experience. Backend built with Node.js + MongoDB for reliable data management.

Auto Posting Shorts (YouTube & Facebook) : [n8n](#) · [Flex Tool API](#) · [Image Generation API](#) · [YouTube API](#) · [Facebook API](#)

Automated workflow for generating and posting short-form video content to YouTube and Facebook. Built on n8n for orchestration, integrating Flex Tool API for video processing, image generation APIs for dynamic visuals, and social platform APIs for auto-posting. Eliminates manual content creation and scheduling for creators and marketers.

Documentary Folder Management System : [Make.com](#) · [Gmail API](#) · [Google Drive API](#) · [OpenAI Assistant](#) · [PDF Generator](#)

Intelligent document management automation that monitors incoming customer emails, extracts project details and attachments, converts email body content to PDF, and organizes all files into customer-specific Google Drive folders. Integrates OpenAI Assistant to identify and classify projects using technical identifiers provided in the email body — streamlining document workflows for enterprise clients.

EDUCATIONS

- Diploma in Computer Applications (DICA) [Refresh metro campus , Puttalam](#)
- Microsoft Office Specialist (MOS) [Microsoft.com](#)
